Defect	Raised By	Tested on version
TC_SIGNUP_07	Abdallah	1.01
TC_SIGNUP_08	Abdallah	1.01
TC_SIGNUP_09	Abdallah	1.01

Bug Title	Preconditions
Sign Up modal does not close when clicking the close button	User is on the Sign Up page
Sign Up accepts usernames with special characters	Sign Up modal is open User is on the Sign Up page
Special characters in password not handled as per policy	User is on the Sign Up page

Steps to Reproduce
Click on the Sign Up button
In the modal, click the Close (X) button
Click on the Sign Up button
Enter a username with special characters (e.g., @###\$%)
Enter a valid password (e.g., 123)
Click Sign Up
Click on the Sign Up button
Enter a valid username (e.g., Aa6)
Enter a complex password with special characters (e.g., Pa\$\$w0rd!2025)
Click Sign Up

Expected result
The Sign Up modal should close without taking any action
Depending on business rules — should either allow or show an error. The system should either restrict special characters or show an appropriate error message, depending on business rules
The sign-up should be successful if the password policy allows special characters

Status	priorty	severity	
Failed	High	High	
Failed	High	High	
Failed	High	High	

Notes
This behavior is misleading. The user does not intend to sign up, yet a success message is shown.
There is no input validation or error message for special characters in the username field.
There should be clarity on password policy and whether special characters are allowed. Despite success
